Subject Index

Key: a Abstract, c Correspondence, e Editorial, r Review, w Workshop

A practical guide for patients on insulin – 150r
A singular thought – a poem 460c
Abstracts – British Diabetic Association – Dublin 463
– EASD – Hungary 151
– Italian Diabetic Association 291
Acarbose – action on gastro-intestinal hormones 468a
Acetylator phenotype – and ABO blood groups in diabetes 192a
Adrenaline – and 2-deoxyglucose accumulation in rat adipocytes 210a
– and metabolism in insulin deficient man 190a
– in diabetes 298a
– relationship with autonomic neuropathy 19
– urinary excretion – hypoglycaemia – Type 1 diabetes 154a
Agarose gel – encapsulating medium for islet transplantation – rat 206a
Albuminuria – preceded by increased glomerular filtration of 184a
– Type 1 diabetes – control with intravenous insulin 192a
Alloxan diabetes – The sorcerer and his apprentice 69
α-1-fucosidase – in relation to glycaemic control 301a
Amino acids – and diabetic control 297a
– mechanisms for decrease after glucose – man 198a
Apolipoproteins – effect of insulin infusion – Type 1 diabetes 170a
Arachidonic acid – low platelet levels in diabetes 178a
Arterial muscle – proliferation rat 163a
– regulation of insulin receptors 191a
Artificial pancreas – biguanides – Type 1 diabetes 34
– glucose utilization – diabetic dogs 168a
– versus manual method – assessment B cell response 191a
Aspirin therapy – use in diabetic retinopathy 104
Atherosclerosis – lipid metabolism – Canadian workshop 76
ATP production – pancreatic islets – obese mice 190a
Australian Aborigines – metabolic adaption to 'traditional' diet 494
Autonomic neuropathy, diabetic – adrenaline and noradrenaline 19
– beat to beat variation 299a
– cardiovascular reflex tests 197a
– complicates insulin infusion systems 194a
– cystopathy 161a
– effect of CSII 162a
– factors relating to heart 168a
– immediate cardiovascular impairment 154a
– impairment of cardiovascular response 292a
– occurring at a diabetic clinic 465a
– mydriasis 161a
– prevalence in a population 299a
– Tear gas for diagnosis 288c

B cell – function – chronic pancreatitis 86
– microtubule and insulin immunofluorescence 280
– regeneration in rats of various ages 203a
B-thromboglobulin – and control in Type 2 diabetes 298a
Barium transport – insulin secretion – Ob/Ob mice 142a
Basement membrane – circulating antigens to, in insulin treated rats 266
– epithelial and mesothelial – diabetic dog and man 521
– glomerular – glycosylation in Type 1 diabetes 485
– – serum 7S collagen concentration 173a
Bezafibrate – lipids in Type 2 diabetes 158a, 305a
Biostator – glucose/non-glucose carbohydrate solutions 163a
Blood glucose profiles – value in correcting fasting hyperglycaemia 471a
Blood glucose strip – accuracy of visualisation 155a
Blood pressure – response to standing in diabetic patients 210a
– studies on total exchangeable sodium in diabetics 472a
Body posture – glucose induced hyperkalaemia 194a
Bombesin – important component in neural control of insulin release 464a
– insulin response to glucose load 197a

C-peptide – antibody status after purified bovine insulin 475a
– in newly diagnosed diabetic children 196a
– levels in infants of diabetic mothers 297a
– levels in subjects with high or low insulin response 292a
– non-molar secretion with insulin – rat 154a
– response to glucagon in Type 2 diabetes 192a
– secretion inhibited by exogenous insulin 295a
– urinary excretion and metabolic control 302a
Caffeine – effect of maternal ingestion in neonatal rat 354
Calcium – action on glucose, arginine, and glibenclamide 189a
Calcium flux – effect of amino acids – rat 160a
– extrusion from cells – rat pancreas 176a
– influence of pH on pancreatic B cell – rat 173a
Calcium uptake – normal and degranulated rat pancreatic islets 210a
– pancreatic islets – Ob/Ob mouse 167a
– rat pancreas – thiol oxidant (DIP+2) 151a
Calcium, intracellular mobilization – events in pancreatic mouse cells 173a
Capillary tubes for blood glucose sampling 539
Carbohydrate metabolism – 150r
Cell division – effect of growth hormone and glucocorticoid – rat 158a
Cell-mediated lympholysis – assessment of insulin immunity 473a
Cellular immunity – Type 1 and Type 2 diabetes 167a
Chest X-ray – value in a diabetic clinic 472a
Chlorpropamide – total and sub-fraction HDL cholesterol 473a
Cholesterol – metabolism in diabetic rat 474a
Cholinergic receptors – pancreatic islets – rat 171a
Clotting factors and the islets of Langerhans 305a
Collagen – skin – mechanical properties in Ob/Ob mice 165a
– the effect of diabetes on 467a
Colour sense deficiencies – effect of diabetes 163a
Coma, hypoglycaemic – and diabetic control 475a
– associated with insulin receptor antibody 303a
– causes and consequences 187a
– in elderly patients 472a
– which mechanism governs recovery? 464a
Coma, ketoacidosis – hyperlactaemia 186a
– no rationale for antiplatelet drugs 286c
Continuous subcutaneous insulin infusion – see CSII.
Contractile activity – prostacyclin generation – dog coronary artery 380c
Control, blood glucose – comprehensive assessment 201a
CPAF – studies on characterization 302a
CSII – and interferon in Type 1 diabetes 190a
– and IP infusion of insulin – dogs 61
– assessment of one year treatment 162a
– basal insulinaemia in Type 1 diabetes 160a
– blood viscosity changes in Type 2 diabetes 207a
– diabetic autonomic neuropathy 294a
– free insulin levels in labile diabetes 300a
– free insulin oscillations 187a
– improvement in nerve conduction velocity 292a
– influence on retinal morphology over one year 183a
– introduction into a diabetic clinic 470a
– longterm treatment of Type 1 diabetes 199a
– pharmacokinetics 193a
– technical problems 178a
Cyclic AMP – in human fibroblast 176a

D cell function – dog 189a
D-Mannose anomers – and rat pancreatic islet function 185a
Diabetes and it's late complications – Workshop in Taormina 284w
Diabetes and the excretion of urinary glycoconjugates 470a

Diabetic clinic – value of non-consultant peripatetic clinics 464a
Diabetic control – assessed by urinary peptides 252
Diabetic education – assessment of programme 246
Dichloroacetate – and glucose synthesis – dog 45
Diet – and complications in Mexican Type 2 diabetes 472a
– and VLDL turnover in Type 2 diabetes 421
– differences in digestibility 477r
– digestible carbohydrate – effect on control in Type 2 diabetes 235
– effect of carbohydrate and lipid intake on these metabolites 185a
– exclusive treatment of Type 2 diabetes 240
– fibre and blood glucose control 195a
– fibre and diabetes 159a
– fibre and poor diabetic control 470a
– high sucrose intake in rat 209a
– influence on insulin receptors – rat 167a
– linoleic acid intake and lipids in Type 1 diabetes 175a
– massive obesity – hormonal and metabolic response 171a
– triglyceride lipase activity after sucrose intake 183a
Dimethyl urea – partial protection in streptozotocin induced diabetes 374
Dopamine – stimulates glucagon and insulin secretion 295a
DPG – daily rhythm during blood glucose normalization 179a
Dupuytren's contraction – relation to diabetes 183a
Dynorphin – and insulin release – rat islets 171a

EASD – Minutes of 17th Assembly 145
EASD – abstracts from Hungary 151
Electrocardiographic abnormalities – a study on relevance 306a
Emotional and academic achievements in children of diabetic mothers 466a
Endocrine pancreas – diurnal variation in hormonal response 306a
– effect of specific blood flows 177a
– morphometry in Type 1 diabetes 180a
Endocrine pattern – pancreas allotransplantation 192a
Endorphin – effect on insulin secretion in Type 2 diabetes 293a
Endothelial cells, human – glucose inhibits replication 436
Entero-insular axis – a new model 297a
– role in hyperinsulinaemia of obesity 469a
Enzymuria – significance in Type 1 diabetes 292
Epidemiology – diabetes in New Caledonia 393
– evolution of glucose tolerance 301a
– five year mortality diabetic patients – Germany 176a
– glucose tolerance – unacculturated tribes – Brazil 90
– incidence rates in Type 1 diabetes – Denmark 160a
– mortality – diabetes – Papua New Guinea 136
– prevalence of diabetes amongst male Saudi Arabs 330
– screening for diabetes – Italy 185a
– screening for diabetes in children – Czechoslovakia 187a
– the diabetic child in society – Hungary 153a
– Type 1 diabetes – Pittsburgh seasonal incidence 79
Erythrocyte deformability – correlations with plasma proteins 304a
– evidence for an insulin role 207a
Ethanol – augments plasma cyclic AMP 476a
Exercise – absent induced hypoglycaemia – in Type 1 diabetes 337
– and insulin action in vivo – rat 162a
– and insulin sensitivity – rat soleus muscle 166a
– changes in blood rheology in Type 1 diabetes 300a
– fructose ingestion and glucose homeostasis 180a
– influence on ketone body transport – man 166a
Exhaustion – lactate increments in diabetic and normal men 198a
Experimental diabetes – absence of H-2 system influence – mice 115
– alloxan diabetes – historical note 69
– B cell lymphoproliferation – BB Wistar rats 261
– blood retinal barrier – rat 179a
– coronary arterial bed – dog 191a
– effect of insulin therapy on basement membrane 266
– effect of metal chelators – mouse 170a
– H-2 complex interaction in mouse 69
– intravenous insulin infusion 194a
– metabolic changes after pancreatic transplant 343
– raised somatomedin activity – pregnant rat 270
– renal subcapsular pancreatic transplantation 180a
– T cell dependent immune response defect 359
Extraction of insulin from plasma for bioassay 467a

Factor X-like antigen – immunohistochemical identification in pancreas 255
Fasting – ketone, glucose, lactate pattern – human brain 156a
Fat, brown – effect of insulin on glucose utilization and lipogenesis 202a
Fc receptors – evidence for presence on adipocytes 180a
Fetal macrosomia – link with maternal hyperlipidaemia 475a
Free fatty acids – composition in HDL – diabetic/normal man 198a

Gamma glutamyl transferase – activity in diabetic comas 143c
Gene expression – glucose regulation – rat islets 158a
GFR – and kidney volume in Type 1 diabetes 476a
GIP – an insulin releasing peptide – pig 188a
– an insulinotropic peptide present in human pancreas? 211a
– effect of intraduodenal and intravenous triglyceride 41
– effect on glucagon secretion – rats 203a
– insulinotropic properties 197a
– release after glucose load – man 164a
Glibenclamide – glycaemic control in insulin treated diabetics 182a
– insulin and glucagon secretion – rat 303a
– intravenous pharmacokinetics 37
– mechanism of action – Type 2 diabetes 153a
– mechanism of acute hypoglycaemia – man 171a
– predicting response to treatment 199a
Glicentin – C terminal sequence of enteroglucagon 175a
Gliclazide – insulin effectiveness – binding to erythrocytes – man 159a
Glipizide – inhibition of platelet aggregation 298a
Glomerulopathy, diabetic – effect of islet transplantation 347
Glucagon – and potassium efflux 186a
– and potassium efflux from liver 300a
– glycolytic cascade – pancreatic cells 1r
– ketone body production – insulin deficient man 94
– receptor binding – pig hepatocyte 181a
– relation placental weight – rabbit 124
– secretion inhibited by glucagon 202a
Glucagon autoantibodies – a clinical study 292a
Glucagon-producing cell autoantibody – follow up 155a
Glucocorticoid receptor – function in Type 1 diabetes – monocytes 156a
Gluconeogenesis – adrenaline stimulated glucose production 197a
Glucose clamp – a new method for insulin sensitivity index 296a
Glucose disposal – before and after weight loss 170a
Glucose synthesis – effect of dichloroacetate – dog 45
Glucose tolerance – chronic inflammatory disease – steroid therapy 155a
Glucose tolerance test – see GTT.
Glucose transport – abnormal in genetically obese (fa/fa) rats 211a
– dependence on preceding extracellular environment 207a
Glucose turnover – CSII and intraperitoneal infusion – dogs 61
– non-steady state 161a
Glucose uptake, peripheral – and splanchnic – man 297a
Glucose, plasma – by four different methods 298a
Glutathione transhydrogenase – and insulin degradation 49
Glycaemic control – and residual B cell function 206a
– improves insulin action in Type 2 diabetes 463a
Glycoconjugates – excretion in diabetic urine 183a
Glycogen synthetase – insulin action in fibroblasts 431

Glycolytic cascade – pancreatic cells 1r
Glycosaminoglycans – and metabolic control 295a
Glycosyl-albumin – normal and diabetic subjects – renal disease 169a
Glycosylated collagen – in skin of diabetic patients 303a
Glycosylated haemoglobin – and fetal haemoglobin – diabetic control 202a
– and oxygen affinity of whole blood 399
– effect of red cell age 291a
– measurement in an outpatient clinic 208a
– stable and labile forms in renal failure 209a
– steady state blood glucose concentration 403
– value in diagnosis of diabetes 164a
Glycosylated haemoglobin, fetal – measurement using short column 470a
Growth hormone – comparing hypoglycaemic response with 4–15 fragment 534
– stimulates hepatic glucose production 473a
GTT – Impaired glucose tolerance in late pregnancy 154a
– intravenous – chromium, zinc and vanadium changes 476a

H-2 complex – relation to autoimmune induced diabetes in mouse 69
H2 system – absence of influence in induced diabetes 115
HDL cholesterol – effect of diet in Type 2 diabetes 23
HLA – and ICA studies in healthy sibs of diabetic subjects 302a
– and production of anti-insulin antibodies 297a
– immunodeficiency in Type 1 diabetes 326
– Type 1 diabetes in HLA identical sibs of Type 1 diabetic parents 379
– Type 2 diabetes – no evidence for linkage 16
Home blood glucose monitoring – and lifestyle 464a
– evaluation of systems 291a
– for visually handicapped 475a
– one week profiles 174a
– one year's experience 184a
– preference for strips 200a
– psychological status and control 203a
– with filter paper strips 190a
Hydroxydopamine – and rubidium ion – islet cell 203a
Hyperosmolarity – and carbohydrate metabolism – man 157a
Hyperthyroidism – insulin delivery rate 108
Hypo-ovarian axis – in ketonuric diabetic Chinese hamster 275
– relation to reproductive cycle in diabetic hamster 275
Hypoglycaemia – action on rat cervical ganglion 180a
Hypoglycaemia, reactive – role of glucagon 208a
Hypoglycaemic syndromes – studied by euglycaemic clamp 291a
Hypoxia – physical training – rat 164a

ICA – a result of trauma? 286c
– cytotoxic insulin release 176a
– direct immunofluorescence test 185a
– in unaffected co-twins 469a
– natural history of Type 1 diabetes 194a
– persistence makes remission unlikely in Type 1 diabetes 205a
IgA – circulating immune complexes in diabetes 206a
Immunodeficiency – in Type 1 diabetes 326
Immunoglobulins – in Type 1 diabetes 326
Immunomodulation – effect of inosiplex – rat 171a
Impedence measurement – in diagnosing angiopathy 175a
Injector gun – as alternative to conventional syringe 304a
Insulin – circulating immune complexes – insulin treated diabetics 159a
– normal and diabetic perfused rat hearts 157a
– relation placental weight – rabbit 124
Insulin absorption – relation to subcutaneous blood flow 174a
Insulin action – changes during pregnancy 474a
– mediator in mouse soleus muscle 183a
Insulin algorithms – comparison in dog 178a
Insulin binding – adipocyte – in patients with hepatic cirrhosis 204a
– and action on fat cells from young people 190a
– caused by biosynthetic proinsulin – man 198a
– effect of carbohydrate restriction 187a
– erythrocyte – human versus porcine insulin 208a
– erythrocyte – Type 1 diabetes – resistance 158a
– in antibody induced diabetes – rat 517
– increased in aged rat pancreatic islets 208a
– metformin – lymphocytes – cancer cells 131
– rat kidney brush border membrane 204a
Insulin bioactivity – enhancement by crosslinking – rat 179a
Insulin degradation – by muscle and fat – insulin resistant diabetes 333
– different tissues – rat and man 181a
– enzyme activity in Types 1 and 2 diabetes 202a
– glutathione transhydrogenase – rat 49, 379c
– product of same molecular size as insulin 201a
– steroid hormones – mouse islets 157a
– Type 2 diabetes – human erythrocyte 167a
Insulin delivery – technical problems with open loop system 196a
– response to glucose/arginine – hyperthyroidism 108
Insulin escape curves – the myth of rebound hypoglycaemia 168a
Insulin gene – DNA sequences flanking 188a
– length heterogenicity in Type 1 diabetes 468a
Insulin infusion – CSII and intraperitoneal infusion – dogs 61
– feedback controlled in Type 1 diabetes 229
– intraperitoneal 191a
– no exercise hypoglycaemia in Type 1 diabetes 337
– remote controlled implanted pump 209a
Insulin kinetics – derangement in insulin therapy 301a
Insulin levels – in subjects with lag storage curves 300a
Insulin molecule – antibodies against evolutionary conserved area 498
Insulin processing – direct evidence in rat hepatocyte 470a
Insulin receptor – affinity modulation – prostaglandin B 155a
– behaviour during and after insulin infusion 200a
– changes after insulin therapy in Type 2 diabetes 195a
– comparison of purification methods 463a
– different degradation processes – rat 193a
– effect of diet in Type 2 diabetes 174a
– in patients with cirrhosis 188a, 300a
– interaction with insulin 381r
– interpretation of structure function relationship 386r
– involvement of microtubule in cardiocyte 165a
– metformin induced changes – mouse liver 184a
– phosphorylation of 207a
– photoaffinity labelling – rat hepatocytes 440
– sulphonylureas 162a
Insulin release – action of 3-phenylpyruvate 200a
– action of amino-acid decarboxylase 183a
– adrenergic inhibition 176a
– altered cation handling? 193a
– cholinergic-peptidergic actions on 184a
– during pregnancy in transplanted rats 188a
– effect of diamide and reduced glutathione 171a
– effect of glucose, leucine and adenosine 209a
– effect of HB419, a new hypoglycaemic agent 179a
– effect of serum IgG in new Type 1 diabetics 211a
– efflux of radioactive nucleotides – mouse 54
– regulation in a human pancreatic islet cell tumour 465a
Insulin resistance – action of peripheral tissues in Type 2 diabetes 163a
– age relation 294a
– catecholamine induced – rat 179a
– evidence for post-receptor defect 169a
– hepatic and peripheral in diabetes 204a, 304a, 313
– in Cushing's syndrome 189a, 301a
– insulin degradation in fat and muscle 333
– liver cirrhosis – glucose clamp 305a
– prednisone induced 160a
– rapid removal of circulating insulin 476a
– Types 1 and 2 diabetes 166a
Insulin response – glucose – pancreatic islet 191a
– modulation by adenosine – rat 178a
Insulin secretion – and extraction in active chronic hepatitis 159a
– calcium dependent enzymes – rat islets 171a
– calcium dependent phosphorylation – rat 158a

- calmodulin and cyclic AMP 466a
- circadian changes of arginine induced stimulation 294a
- detecting residual amount at a general hospital 464a
- effect of amino-acid – monkey 541
- effect of intravenous triglyceride – pig 41
- effect of rat hypothalamic extract 293a
- effect of rat ventrolateral hypothalamus 156a
- effect of varying calcium levels – rat 203a
- effects of Taxol and Nocodazole 469a
- endogenous opiates – Type 2 diabetes 298a
- evidence for transglutaminase involvement – rat 159a
- fresh and cultured human islets of Langerhans 466a
- from different fetal pancreases 195a
- human fetal pancreas – organ culture 426
- human pancreatic islet cloning 186a
- hyperthyroidism 108
- influence of oral cavity in Type 2 diabetes 166a
- inherited deficiency in Type 2 diabetes 470a
- inhibited by lithium 295a
- inhibition by yohimbine – mouse 182a
- islets after electrical discharge 211a

Insulin secretion, residual – in insulin treated Type 2 diabetes 169a
- level in sulphonylurea treated patients 168a

Insulin secretory granules – isolation from rat islet cell tumour 365
Insulin sensitivity – after HB 420 treatment in Type 2 diabetes 189a
- comparison of three methods 173a
- hepatic and peripheral – in Type 2 diabetes 320
- improves after glucose ingestion in fat cells 464a

Insulin syringes – effect of preloading 182a
Insulin therapy – based on kinetics of insulin absorption 163a
- insulin sensitivity in Type 2 diabetes 320
- intermediate insulin and morning hyperglycaemia 167a

Insulin treatment – greater hypoglycaemic effect with pulsed insulin 471a
- honeymoon period Type 1 diabetes 469a

Insulin, human – action on blood rheology 471a
- blood glucose control 161a
- comparison with control on porcine insulin 167a, 471a
- prelimary results 299a
- studies with nuclear magnetic resonance 185a
- versus porcine insulin – action on ketone bodies 466a
- – glucose clamp 300a
- – short term trial 207a
- – Type 1 diabetes 202a

Insulin-like growth factors – in hypophysectomised rat 199a
Insulinotropic agents – action on cyclic AMP – rat 168a
Insulitis – multiple low doses 199a
Is gestational diabetes a clinical entity? 307r
Islet cell antibody: see ICA
Islet cell populations – patterns in diabetes 194a
Islet cell tumour – occurring in diabetes 465a
- protective effect of diet-induced ketosis 474a

Islet cells, reaggregating purified 175a
Islet transplantation – intrasplenic – mouse 151a
Islets, pancreatic – blood flow – rats 177a
- deterioration in secretary control – rat 200a
- efflux of pancreatic nucleotides – mouse 54
- flow-cytometric analysis – transmembrane potential 212a
- function in gold thioglucose obesity – mice 119
- limited use after irradiation – rat 211a
- two classes – calf 165a

Kallikrein – increased levels in diabetic patients 305a
Ketoacidosis – see coma, ketacidotic
Ketogenesis – effect of thyroid hormones 186a
- ketogenic capacity of glucagon – man 169a

Ketone bodies – kinetics in cirrhosis 291a
Ketone body turnover – factors regulating – man 205a
- non-steady state 161a

LDL – binding and degradation – Type 2 diabetes 28
Left ventricular function – in Type 1 diabetes 299a
Leucine – incorporation into proinsulin of mice islets 198a
Levamisole – in diabetics with long-term urinary infections 196a
Leydig cells – evaluation of steroid biosynthesis – diabetic rat 529
Lipolysis – effect of phenylalkyloxirane – diabetic rat 196a
Lipoprotein – relation to treatment and control of diabetes 165a
- rice versus potato starch 151a

Lipoprotein lipase – role of insulin in regulation 292a
Liver metabolism – triiodothyronine treatment – rat 153a
Longitudinal study of metabolic control in diabetic children 471a
Lymphoproliferation – of B cells in diabetic Wistar rats 261
Lysosomal enzymes – obese and mixed diabetic patients 162a

Macroangiopathy – and impaired glucose tolerance 305a
- arterial stiffness and narrowing 188a
- coronary artery disease – Type 2 diabetes 186a
- relation to lipids in Type 1 diabetes 292a
- studies in middle-aged diabetic subjects 178a

Magnesium – regulation of insulin release 154a
Manganese – pancreatic B cells in ob/ob mice 196a
Menstruation and diabetic control 476a
Metabolic control – the effect of a summer camp – Type 1 diabetes 297a
Metabolic risk factors in ischaemic Cardiovascular Disease 150r
Metformin – and cholesterol metabolism – rat 200a
- and insulin binding – cancer cells 131
- improves insulin binding in obese patients 302a
- improves insulin binding in vivo 306a
- improves post receptor defect in Type 2 diabetes 205a
- in Type 1 diabetes – artificial pancreas 34

Microalbuminuria – a simple agglutination test 475a
Microangiopathy – decreased distensibility of passive vascular bed 411
- immune complex formation 296a
- rheological and clotting parameters 294a
- studies on platelets 302a

Minipump, insulin – in a Type 1 diabetic patient 200a
MODY – clinical investigations 171a
Monesin – effect on isolated rat islets 201a
Motor conduction velocity – faster in women 544
Myocardial B receptor – effect of streptozotocin – rat 170a

N-acetyl-B D-glucosaminidase – activity in diabetes 472a
NAD+/NADH – relationships mouse islets – glucose stimulation 159a
Negative cooperativity – effect of slow phase insulin dissociation 171a
Nephropathy, diabetic – Canadian Workshop 77
- changes in rat kidney tubules 194a
- effect of anti-hypertensive therapy 187a
- effect of islet transplantation – rat 347
- exercise induced albuminuria 160a
- urinary immunoglobulin G and B2-microglobulin 293a

Neuropathy, diabetic – Canadian Workshop 76
- conduction velocity in Chinese hamster 445
- identifying feet at risk from ulceration 465a
- metabolic and genetic factors 157a
- significance of pain 464a

Nicotinamide – and mouse pancreatic function 197a
Noradrenaline – and pancreatic hormone secretion – dog 206a
- in diabetes 298a
- relationship with autonomic neuropathy 19

Normoglycaemia, acute – hormonal metabolic studies in Type 1 diabetes 220

Obesity – decreased K Na – APTase activity – man 180a
- hyperinsulinaemia 6
- hyperinsulinaemia in fa/fa rats 196a
- islet function after gold thioglucose – mice 119
- long-term weight reduction programme – women 181a
- metabolic and hormonal reponse to a mixed meal 304a
- studies on hormones 206a

Oestradiol – augments insulin stimulated glucose metabolism 473a

Open heart surgery – control of diabetes 165a
Opiate addicts – glucose tolerance 459c
Opiates – action on pancreatic secretion – dog 174a
Oral hypoglycaemic agents; see under individual names
Osmolarity – ketoacidosis – rehydrating solutions 176a
Ovarian hormones – on insulin stimulated glucose metabolism – mouse 152a

Pancreas, exocrine – effect of CCK8 and secretin 201a
Pancreatic B cell – molecular cloning – rat 179a
Pancreatic function – exocrine – virus induced bovine diabetes 65
Pancreatic islets – blood flow – rats 177a
– efflux of pancreatic nucleotides – mouse 54
– two classes – calf 165a
Pancreatic polypeptide – diurnal profile – obesity 153a
– effect of morphine – man 162a
– in Wistar rat 472a
– meal induced increases 169a
– response in normoglycaemic diabetes 463a
– ventral pancreatic primordium 141c
Pancreatitis, chronic – B cell function – exocrine function 86
Passive vascular bed – decreased distensibility in diabetes 411
Patient data – a new technique 467a
Phenformin – how withdrawl affects HbA_{1c} in obese Type 2 diabetes 466a
Phospholipid – metabolism in rat islets 155a
Photocoagulation – diabetic retinopathy – UK 138
– Type 1 diabetes – proliferative retinopathy 77r
Pi depletion – effect on mitochondrial uptake of alloxan 157a
Placental weight – insulin levels – rabbit fetus 124
Platelet adhesiveness – effect of vasopressin analogue 192a
Platelet aggregation – after control using artificial pancreas 545
Platelet specific proteins – effect of improved diabetic control 195a
Polyneuropathy, diabetic – microneurographic findings 415
Pregnancy, diabetic – C-peptide levels in amniotic and cord blood 211a
– congenital malformations – rat 165a
– CSII effect on metabolic control 294a
– effect on retinopathy in Type 1 diabetes 182a
– gestational diabetes – a review 307r
– hormone levels and insulin requirements 153a
– ICA – humoral immunity 164a
– insulin and glucagon responses to amino-acids 182a
– islet cell proliferation in rat pancreas 525
– isoglycaemic stimulation of hormones 175a
– metabolic profiles of cord blood 191a
– raised plasma somatomedin activity – rat 270
– somatomedin levels 192a
Proinsulin – effect of amino-acids 171a
Prostacyclin – reduced platelet sensitivity in diabetes 193a
Protein breakdown, muscle – in uncontrolled diabetes 456
Protein synthesis – effect of insulin – mouse soleus 187a
– effect of insulin and oleate – starved rat 202a
Proteinuria – exercise induced in diabetic children 142c
Pyruvate decarboxylation – effect of insulin and DCA – rat hepatocyte 463a

Red cell deformability – relation of red cell cholesterol 295a
Reflectance meter – use in general practice 467a
Renin – inactive form in Type 1 diabetics with microangiopathy 467a
Residual B cell function: see insulin secretion, residual
Retinopathy, diabetic – aspirin effect on aggregation 104
– British multicentre study 180a
– Canadian Workshop 77
– hyperviscosity – hyperfibrinogenaemia 156a
– lymphocyte subsets and immune complexes 303a
– management of late complications 158a
– photocoagulation – UK 138
– relation of hormones and metabolites 185a
– relation to joint and respiratory changes 184a
– study on improved diabetic control 469a
– thrombocyte hyperaggregation 178a
– Type 1 diabetes – photocoagulation 77r
– visual disability 504

Scotchcast therapy – in ulcerated diabetic feet 465a
Secondary drug failure – mechanisms in Type 2 diabetes 171a
Sexual dysfunction – in diabetic males 299a
Sodium depletion – renal excretion of electrolytes – dog 152a
Somatomedin – pregnancy 192a
– relation placental weight – rabbit 124
Somatostatin – and metabolism – CSII 198a
– effect of adrenergic agents on lipolytic action 201a
– effect of exogenous insulin/anti-insulin sera 199a
– insulin pharmacokinetics 189a
– ketone body production – insulin deficient man 94
– multiple forms – duck 164a
– Type 2 diabetes 161a
Stimulus-secretion coupling – role of K ion permeability 203a
Substance P – circulating level in normal and diabetic subjects 467a
Sweetness in the diabetic diet 213r

T cell – immune response defect in diabetic BB rats 359
The combined diabetic foot clinic 468a
The course of impaired glucose tolerance 287c
The diabetic diet, dietary carbohydrate and difference in digestibility 477r
The interaction of insulin with it's receptor 381r
The mechanism of insulin action controversy 391r
The role of the pharmaceutical industry in diabetic research 216e
Thyroid hormones – effect on glucagon/insulin receptors 197a
Thyrotropin releasing hormone: see TRH
Tolbutamide – effect on insulin mediated glucose uptake 194a
– insulinotropic effect in mouse 153a
Transplantation, pancreatic – analysis of eight cases 205a
– early graft failure 303a
– endocrine patterns 303a
– long-term study – rat 210a
– metabolic changes after a renoportal shunt 343
Transplantation, pancreatic and renal – in two uraemic subjects 294a
Trestatin – effect on post-prandial blood glucose in rat 181a
TRH – immunoreactivity in pancreatic islets 188a
Triglyceride – effect on infusion on glucose metabolism – man 204a
TSH – action on metabolic control in Type 1 diabetes 471a
Tubular phosphate reabsorption – dysfunction in Type 1 diabetes 406
Type 1 diabetes – abnormal transcutaneous oxygen tension 468a
– and thyroid disease in affected families 171a
– anti-nuclear antibodies 170a
– assessment of educational programme 246
– biguanides – artificial pancreas 34
– causes of thrombophilic diathesis 182a
– circulating immune complexes 157a
– comparison of twice daily insulin regimens 473a
– daily insulin requirements – artificial pancreas 305a
– dysfunction of tubular phosphate reabsorption 406
– effect of control on retinopathy over 2 years 175a
– effect of glucose ingestion on nervous activity 173a
– effect of volume loading on ventricular function 177a
– empiric risk figures for relatives 205a
– evaluation of two schemes of insulin injection 207a
– failure of glomerular auto-regulation 210a
– feedback controlled insulin infusion system 229
– glycosylation in the glomerular basement membrane 485
– HDL-cholesterol – CSII 155a
– hepatic and peripheral insulin resistance 313
– hormonal and metabolic response to hypoglycaemia 499
– how does glucose act on the pancreatic A cell? 152a
– how insulin regimens affect control during exercise 206a

- hypoglycaemia – delayed glucose recovery 156a
- IgA deficiency – an inherited association 177a
- insulin antibodies impair insulin kinetics 209a
- lymphocyte subpopulations 193a
- mixed mixture versus tailor made preparations 473a
- Pittsburgh – seasonal incidence 79
- prognostic value of urinary albumin excretion 208a
- reduced insulin disposal 163a
- reduced peripheral uptake of glucose 296a
- relationship of proteinuria to nephropathy 186a
- renal transplantation – Norway 177a
- role of free insulin, glucagon and adrenaline 296a
- role of Ia-positive antigen-bearing T cells 475a
- separation of lymphocyte subsets 298a
- studies with the artificial endocrine pancreas 220
- suppressor T cell function – monoclonal antibodies 168a
- use of an immunosuppressive 474a
- variation in renal glucose threshold 177a

Type 2 diabetes – abnormalities of haemostasis 296a
- autoregulation of blood flow 190a
- binding and degradation – LDL 28
- changes in neurophysiological parameters 304a
- correlations of glucose and intermediary metabolites 468a
- decreased LDL metabolism 181a
- dietary effect on HDL cholesterol 23
- digestible carbohydrate – effect on control 235
- effect of Acarbose on gut hormones 174a
- hepatic and peripheral insulin resistance 313
- insulin production rate 6
- lipoprotein change in obese subjects 152a
- modulation of gut hormones 151a
- mortality in Papua New Guinea 136
- no evidence of HLA linkage 16
- obese – efficacy of dietary instruction 152a
- pedal vibration threshold after 5 years 174a
- prospective study on effect of treatment on lipids 507
- treatment with diet alone 240
- VLDL – dietary effects 101

Unemployment in a diabetic population 469a
Urban diabetic clinic – why patients are lost to follow up? 474a
Uric acid – renal clearance in diabetes 204a
Urinary glycopeptides – assessment of diabetic control 252
Urine glucose tests – are they reliable? 209a

Vascular prosthesis – for implantation of mouse islets 465
Vascular reactivity – response to hypoxia in microangiopathy 468a
Vasopressin analogue – effect of infusion on von Willebrand factor 452
Videotape technique – U 100 insulin education 475a
VIP – effect on hepatic gluconeogenesis – rat 166a
Virus-induced diabetes – exocrine function in cattle 65
Visidex – a new blood glucose strip 466a
VLDL – dietary effects in Type 2 diabetes 101
- maternal contribution to fetal circulation – guinea pig 204a
- turnover in Type 2 diabetes 421

Workshop report – Taormina. Diabetes and its late complications 284w
- Tenth Canadian Workshop on diabetes 76w

Xylose uptake – inhibition in muscle – a post-receptor defect 511
